**AMENDMENTS TO THE SPECIFICATION**

**IN THE TITLE OF THE INVENTION:**

*Please amend the title of the invention as follows:*

APPARATUS AND METHOD TO CAPTURE IMAGE AND OTHER DATA AND  
RECORDING ONTO MULTIPLE RECORDING MEDIUM

**IN THE SPECIFICATION:**

*Please replace the paragraph beginning on page 1, line 23  
with the following rewritten paragraph.*

It has been proposed that a digital camera be equipped with a plurality of card slots so that a plurality of memory cards described above can be loaded simultaneously. If a digital camera is equipped with a plurality of card slots, photographed images can be recorded in a the plurality of memory cards, thereby the number of photographable images will be increased. However, a user has to designate in which memory card of a card slot to record data. If the designated card slot does not load have a memory card loaded, a the user has to conduct the necessary operations, such as to reselect a card slot, because the data will not be recorded as it is. Thus, simply increasing the number of card slots makes the operation complex.
